PRZED MONTAŻEM

Przed rozpoczęciem montażu prosimy o dokładne zapoznanie się z niniejszą instrukcją. Do montażu produktu potrzebne są co najmniej 2 osoby. Daj wystarczająco dużo czasu na instalację, zalecamy co najmniej pół dnia. Szklarnię należy ustawić i zamocować na płaskiej powierzchni.

Wybierz słoneczne miejsce z dala od zwisających drzew. Jeśli mocujesz szklarnię bezpośrednio do solidnego betonowego fundamentu, użyj wstępnie wywierconych otworów w dostarczonym metalowym fundamencie.

Postępuj zgodnie z krokami montażu w dokładnej kolejności. Wyjmij wszystkie komponenty i części z opakowania. Przed montażem sprawdź wszystkie komponenty i części. Wszystkie części są ponumerowane. Numery te należy sprawdzić na dołączonej liście części. Części należy umieścić w łatwo dostępnym miejscu. Wszystkie małe części (śruby itp.) przechowuj w misce lub innym pojemniku, aby się nie zgubiły. Należy pamiętać, że w tym produkcie zastosowano profile wielostronne. Dzięki temu część otworów w profilach nie jest wykorzystywana podczas montażu.

REKOMENDACJE

Aby ułatwić regulację położenia poszczególnych części podczas montażu, nie należy mocno dokręcać śrub. Wszystkie śruby należy dokręcić dopiero na ostatnim etapie montażu. Zalecamy oklejenie ramy taśmą lub dodanie pianki/gumy w miejscach styku łączników i w miejscu styku ramy z osłoną. Przedłuży to żywotność pokrowca.

INSTRUKCJE BEZPIECZEŃSTWA

Przed montażem szklarni upewnij się, że w ziemi nie ma ukrytych rur ani kabli. Zdecydowanie zalecamy używanie rękawic roboczych, mocnego obuwia, ochrony głowy (np. kasku) i okularów ochronnych podczas montażu. Nie modyfikuj w żaden sposób konstrukcji szklarni. Podczas montażu nie wieszaj żadnych ciężarów ani części na ramie. Nie próbuj montować szklarni przy wietrznej lub deszczowej pogodzie. Nie należy umieszczać szklarni w miejscu narażonym na działanie nadmiernego wiatru. Nie buduj szklarni w pobliżu linii energetycznych. Nie przesuwaj szklarni podczas montażu. Trzymaj dzieci z dala od miejsca montażu. Nie przystępuj do montażu szklarni jeśli jesteś zmęczony, pod wpływem narkotyków, alkoholu lub masz zawroty głowy. Podczas korzystania z drabiny lub elektronarzędzia należy przestrzegać instrukcji bezpieczeństwa producenta. W pobliżu szklarni nie wolno przechowywać gorących przedmiotów, takich jak niedawno używane grille, palniki itp. Nie ponosimy odpowiedzialności za uszkodzenia lub obrażenia spowodowane niewłaściwą instalacją, nieautoryzowanymi modyfikacjami lub ekstremalnymi warunkami pogodowymi. Budynek ten nie jest przeznaczony na mieszkania.

PO MONTAŻU

Regularnie chodź po szklarni i sprawdzaj ją dokładnie, aby upewnić się, że wszystkie części są prawidłowo przymocowane, a cała konstrukcja jest w porządku. Sprawdź wszystkie śruby i nakrętki, a także wszystkie połączenia, aby upewnić się, że są we właściwym położeniu. Zdecydowanie zalecamy natychmiastowe usunięcie śniegu. Nie zostawiaj śniegu na dachu na noc. Zawsze należy zachować wolną przestrzeń około 1 metra ze wszystkich stron. Nie dopuszczaj do gromadzenia się śniegu po bokach szklarni. W przeciwnym razie nacisk z boków wepchnąłby się do środka i szklarnia mogłaby się zawalić.

KONSERWACJA

Do czyszczenia szklarni należy używać odpowiednich środków czyszczących, które następnie spłukuje się wodą. Do czyszczenia nie należy używać acetonu, ściernych środków czyszczących ani innych specjalnych produktów.

Aby ułatwić regulację położenia poszczególnych części podczas montażu, nie należy mocno dokręcać śrub. Wszystkie śruby należy dokręcić dopiero na ostatnim etapie montażu.

Użyj części **F4**, aby zabezpieczyć śruby przed rdzą.

Element **GE** służy do połączenia szklarni z gruntem. Podstawą musi być płaska podłoga betonowa lub drewniana.
